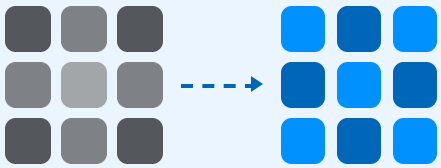
UNITEDLAYER®

SOLUTION FLYER

OPEN VIRTUALIZATION STRATEGY

VMware Replatforming to KVM

Move off VMware lock-in onto open, enterprise-grade KVM, fully managed on a dedicated, single-tenant United Private Cloud®.



VMware estate
Cost · lock-in

KVM on UPC
Open · dedicated

Phased replatforming, wave by wave

Open
Linux-native KVM, no hypervisor lock-in

99.999%
Enterprise-grade availability

Single tenant
Dedicated compute, storage and network

Fully managed
24/7, from assessment to day two

Why KVM on UPC

- No per-core hypervisor licensing
- Dedicated, single-tenant private cloud
- Tier 3+ data centers in 30+ regions
- Runs alongside VMware and Hyper-V
- Self-service VDCs, catalogs and quotas
- DRaaS, Cyber vault and zero-trust built in

How we replatform

01 **Assess**
Map hosts, VMs and dependencies

02 **Plan waves**
Rank workloads by risk and readiness

03 **Convert & validate**
Test each app in a staging VDC

04 **Cut over in phases**
Move wave by wave with rollback

05 **Operate & optimize**
24/7 managed day-two operations

COMMON STARTING POINTS

VMware renewal deadline · Data center exit · Regulated workloads · Disaster recovery · Dev / test · Hybrid cloud
