Where UnitedLayer Helps Media & Entertainment Organizations

Key solution areas for studios,
broadcasters, streaming platforms,
gaming, and digital content operations.

Media Production & Post-Production

GPU-accelerated AI
infrastructure for
rendering, VFX &
media workflows.

Broadcast & Playout Infrastructure

Low-latency
infrastructure for
reliable broadcast,
playout, and content
delivery.

Content Storage & Archive

Petabyte-scale
storage for secure
media archives and
fast content access.

Remote Collaboration Workflows

Secure cloud access
enabling seamless
collaboration across
distributed teams.

Streaming & Digital Platforms

Scalable cloud
infrastructure for high-
performance
streaming and digital
platforms.

AI for Content Operations

AI-ready infrastructure
for media processing,
analytics, and
intelligent automation.

Business Continuity & Disaster Recovery

DRaaS and
Immutable Cyber vault
Backup for resilient
recovery and business
continuity.

Security & Rights Protection

Zero Trust security to
protect media assets,
applications, and
critical data.

Faster Production

Content Resilience

Secure Distribution

AI-Ready Media

Media & Entertainment Cloud Capabilities

A secure, scalable, and intelligent platform architecture designed for modern media workflows.

Software-Defined Private Cloud

- 99.999% availability with N+M clusters
- On-demand scaling of cloud resources
- Software-defined network, compute, and storage
- Integrated security with restricted access

Hybrid Cloud Infrastructure

- 30+ Private Cloud Regions and 175+ edge locations
- Connectivity to cloud and distributed production environments
- Fully managed cloud services
- Integrated disaster recovery services

UPC Accelerated

- GPU-optimized private cloud
- AI-ready environment for rendering, VFX, and media analytics
- Supports intelligent content operations and performance-intensive workloads
- Predictable economics and managed operations

UPC Built-in Intelligence

- Unified observability
- Centralized cloud management
- Automation and orchestration
- Real-time monitoring, compliance, and cost optimization

Media & Entertainment Case Study

United Private Cloud & Petabyte-Scale Storage for Media Production

A leading media production company needed a secure, high-performance infrastructure for content creation, rendering, and petabyte-scale media storage. UnitedLayer delivered United Private Cloud (UPC) with scalable storage to support resilient media workflows.

Business Need

- High-performance infrastructure for media production and post-production
- Petabyte-scale storage for growing media assets and archives
- Low-latency access for editing, rendering, and collaboration
- Secure, scalable infrastructure for expanding production workflows

Solution Delivered

- Deployed United Private Cloud (UPC) for secure, scalable media workloads
- Delivered petabyte-scale storage for media assets, archives, and content repositories
- Enabled AI-ready GPU compute with UPC Accelerated for rendering and production workflows
- Integrated UnitedConnect®, UPC Built-in Intelligence, DRaaS & Immutable Cyber Vault for cyber resilience.

Media Workflow Priorities

- High-Performance Production
- Petabyte-Scale Storage
- AI-Ready Infrastructure
- Secure Collaboration
- Operational Visibility

Business Impact

- Accelerated content production and rendering
- Centralized petabyte-scale media storage
- Improved collaboration across production teams
- Scalable infrastructure for growing media libraries
- Enhanced operational efficiency with intelligent cloud management
- Business continuity with disaster recovery and ransomware protection
