

United Private Cloud for **Technology**

Secure software-defined private cloud with AI-ready acceleration and built-in intelligence for techn companies, SaaS providers, and software platforms.

Helping technology organizations scale faster with secure private cloud, GPU-ready AI, and unified observability.

IaaS & PaaS Services

Where **UnitedLayer** Helps Technology Organizations

Key solution areas for providers, payers, life sciences, medical devices, and digital health ecosystems.

Scale SaaS Platforms

Support HIPAA-aligned infrastructure, secure access controls, and encryptions.

Modernize App Infrastructure

Run EMR, EHR, PACS, RIS, and clinical systems on secure private cloud.

Accelerate AI Innovation

Deliver telehealth experiences with resilient, low-latency infrastructure.

Support Product Growth

Store and protect imaging, genomics, device, and application data at scale.

Strengthen security

Protect critical systems with zero-trust security, monitoring, and cyber resilience.

Disaster Recovery

Keep healthcare systems always available with DRaaS, failover.

Hybrid Cloud Connectivity

Improve utilization and reduce IT complexity with intelligent cloud operations.

Optimize Costs & IT Operations

Leverage AI-ready infrastructure for medical analytics and better care outcomes.

Technology Cloud Capabilities

A secure, scalable, and intelligent platform architecture designed for modern technology workloads.

Software-Defined Private Cloud

99.999% N+M availability, software-defined infrastructure, on-demand Storage, and IP-restricted security.

Hybrid Cloud Infrastructure

Secure private cloud spanning 30+ regions, 175+ edge locations, with managed services and integrated disaster recovery.

UPC Accelerated

GPU-optimized private cloud for AI-driven telecom analytics and automation, with predictable managed economics.

UPC Built-in Intelligence

Unified platform for observability, centralized management, automation, and real-time monitoring and cost optimization.

Technology Industry Snapshot

Secure, Scalable Infrastructure for Modern Software and Digital Platforms

Business Challenges

- Needed scalable infrastructure for cloud-native applications and digital platforms.
- Required strong uptime, performance, and secure customer data protection.
- Sought flexibility to support fast growth, product launches, and changing workload demand.
- Required a globally distributed infrastructure to support users, workloads, and business expansion.

Solutions Delivered

- Delivered secure, globally distributed infrastructure using United Private Cloud®, UnitedSecure™ and UnitedConnect®.
- Enabled high availability, hybrid connectivity, and resilient backup and recovery.
- Supported AI-ready and performance-intensive workloads with UPC Accelerated.
- Provided built-in intelligence for observability, cloud management, and optimization.
