UNITEDLAYER®

United Private Cloud for **Technology**

Secure software-defined private cloud with AI-ready acceleration and built-in intelligence for technology companies, SaaS providers, and software platforms.

Helping technology organizations scale faster with secure private cloud, GPU-ready AI, and unified observability.

Secure **Scalable** **Intelligent**

Where UnitedLayer Helps Technology Organizations

Key solution areas for SaaS providers, software companies, digital platforms, and technology-driven enterprises.

Scale SaaS Platforms

Scale multi-tenant SaaS platforms on secure, high-performance private cloud infrastructure.

Modernize App Infrastructure

Move legacy and cloud-native applications to a software-defined, container-ready platform.

Accelerate AI Innovation

Train and deploy AI models on GPU-ready infrastructure with predictable costs.

Support Product Growth

Add capacity on demand to support product launches, new users, and global expansion.

Strengthen security

Protect code, customer data, and platforms with zero-trust security and continuous monitoring.

Disaster Recovery

Keep products and services always available with DRaaS, immutable backups, and failover.

Hybrid Cloud Connectivity

Connect private cloud, public cloud, and edge with secure, low-latency hybrid networking.

Optimize Costs & IT Operations

Reduce cloud spend and IT complexity with intelligent automation and observability.

Outcomes That Drive Technology Forward

- Faster Time to Market
- Platform Resilience
- Secure Growth
- AI-Ready Innovation

UNITEDLAYER®

Technology Cloud Capabilities

A secure, scalable, and intelligent platform architecture designed for modern technology workloads.

Software-Defined Private Cloud

99.999% N+M availability, software-defined infrastructure, on-demand Storage, and IP-restricted security.

Hybrid Cloud Infrastructure

Secure private cloud spanning 30+ regions, 175+ edge locations, with managed services and integrated disaster recovery.

UPC Accelerated

GPU-optimized private cloud for AI-driven AI analytics and automation, with predictable managed economics.

UPC Built-in Intelligence

Unified platform for observability, centralized management, automation, and real-time monitoring and cost optimization.

Technology Industry Snapshot

Secure, Scalable Infrastructure for Modern Software and Digital Platforms

Business Challenges

- Needed scalable infrastructure for cloud-native applications and digital platforms.
- Required strong uptime, performance, and secure customer data protection.
- Sought flexibility to support fast growth, product launches, and changing workload demand.
- Required a globally distributed infrastructure to support users, workloads, and business expansion.

Solutions Delivered

- Delivered secure, globally distributed infrastructure using United Private Cloud®, UnitedSecure™ and UnitedConnect®.
- Enabled high availability, hybrid connectivity, and resilient backup and recovery.
  .
- Supported AI-ready and performance-intensive workloads with UPC Accelerated.
- Provided built-in intelligence for observability, cloud management, and optimization.

Technology Transformation Priorities

- High – Availability
- Security
- AI – Ready Infrastructure
- Visibility

Relevant Capabilities

- Faster Product Delivery
- Automation
- Secure & Resilient
- Cost control
- Scalability & Support

Scale Smarter. Secure Faster.
