

Stop paying for DR you never activate

Industry's first on-demand DRaaS for the enterprise private AI era. Replication stays warm and your RPO/RTO tiers stay committed — heavy compute bills only when you activate DR or run a drill.

Replicate

Activate

Recover

Prove

WE CHANGED THE MATH

CONVENTIONAL DR — you fund a standby you hope never to use

Full standby compute running 365 days a year

Used: a few days

UPC DRaaS — warm replication always on, compute billed on activation

Storage + warm replication — RPO/RTO tiers committed 24/7/365

Compute on activation

PICK THE TIER EACH APPLICATION DESERVES

Platinum

RPO **Near-zero**
RTO **15 minutes**

Gold

RPO **< 15 minutes**
RTO **1 hour**

Silver

RPO **< 1 hour**
RTO **4 hours**

FOUR PROBLEMS, ONE PLATFORM

AI-Ready Resilience

DR for the whole AI stack — model registries, VLMs, training and inference data, delivery continuity.

Immutable Defence

Cyber recovery, immutability by default, model integrity protection, clean-room recovery.

Strategic VMware Exit

A controlled bridge off legacy VMware — migration-ready DR and modern hypervisor support.

Powering Private AI

DR built in, observability built in, AI-powered recovery, platform-level resilience.

BUILT FOR ENTERPRISE RESILIENCE

Elastic cost model

Pay primarily for storage; invoke on-demand services as required.

99.999% HA compute

N+M high availability, running through component failure.

Secure multi-tenancy

Isolated environments with tenant separation and security controls.

On-demand services

Compute, firewalls, load balancers, P2P, and BaaS from one vendor.

Global availability

Frankfurt, Germany and Santa Clara, California.

24x7 expert support

Continuous monitoring and rapid execution during DR events.

WHY IT PAYS

>30%

YoY saving vs hyperscale

50%

Better than on-premises DR

70%

Better than private cloud DR

30+

Global compliance standards

Let's build your continuity plan.

Speak with a specialist, or ask us to model your RPO/RTO tiers and DR cost.
