UPC SOVEREIGN™

CLOUD YOU CONTROL. DATA THAT STAYS YOURS.

UNITEDLAYER®

UNITED PRIVATE CLOUD® PORTFOLIO

UNITEDLAYER.COM

Cloud that belongs to you, wherever you operate.

A dedicated, single-tenant private cloud for **government agencies, enterprises, and regulated industries** that cannot compromise on where data lives, who can access it, or which laws govern it.

Reside | **Govern** | **Prove** | **Operate**

THREE DIMENSIONS OF SOVEREIGNTY

Data sovereignty

Your data is subject to the laws of the country where it is stored, and only those laws. No hyperscaler access, no cross-border replication without consent.

Operational sovereignty

Always-on, always-in-jurisdiction. Critical applications stay resilient through regional disruption, with business continuity and DR built in.

Digital sovereignty

You own and control the encryption keys, the access policies, and the audit trail — with policy-as-code governance and full transparency.

WHAT'S INCLUDED

UPC Sovereign Core

- Fully managed private cloud at your sovereign-chosen location
- Aligned with GDPR, DORA and others
- Multi-hypervisor: VMware, KVM, Hyper-V, Canonical
- Built-in Observability, AIOps, and Agentic Orchestration

UPC Secure Multi-Cloud Orchestration

- Data sovereignty and policy enforcement across clouds
- Centralized policy-as-code with real-time audit visibility
- AI-driven workload placement and compliance automation
- One control plane for public, private, and edge

UPC AI-Optimized Sovereign Cloud

- Dedicated GPU clusters within your sovereign perimeter
- Pipelines for AI model training and inference
- Encryption in transit and during model training
- EU AI Act compliance mapping and data lineage

UPC HPC Sovereign

- Optimized infrastructure for compute-intensive workloads
- High-throughput interconnects inside the boundary
- Scalable architecture with dedicated storage tiers
- Certified for national security and critical infrastructure

PRE-CERTIFIED ACROSS GLOBAL FRAMEWORKS

NIST | **ISO 27001** | **SOC 1 / SOC 2** | **DISA** | **PCI DSS** | **GDPR** | **HIPAA**
