

— OPEN VIRTUALIZATION STRATEGY

VMware Replatforming to KVM

Move off VMware lock-in onto open, enterprise-grade KVM, fully managed on a dedicated, single-tenant United Private Cloud®.

VMware estate

Cost · lock-in

KVM on UPC

Open · dedicated

Phased replatforming, wave by wave

Open

Linux-native KVM, no hypervisor lock-in

99.999%

Enterprise-grade availability

Single tenant

Dedicated compute, storage and network

Fully managed

24/7, from assessment to day two

Why KVM on UPC

- ✓ No per-core hypervisor licensing
- ✓ Dedicated, single-tenant private cloud
- ✓ Tier 3+ data centers in 30+ regions
- ✓ Runs alongside VMware and Hyper-V
- ✓ Self-service VDCs, catalogs and quotas
- ✓ DRaaS, Cyber Vault and zero-trust built in

How we replatform

- 01 Assess**
Map hosts, VMs and dependencies
- 02 Plan waves**
Rank workloads by risk and readiness
- 03 Convert & validate**
Test each app in a staging VDC
- 04 Cut over in phases**
Move wave by wave with rollback
- 05 Operate & optimize**
24/7 managed day-two operations

COMMON STARTING POINTS

VMware renewal deadline

Data center exit

Regulated workloads

Disaster recovery

Dev / test

Hybrid cloud
